SUMMARY

Analytics Engineer and Senior BI Developer on the Microsoft stack. I work across the full data cycle: from understanding the business problem to integrating and modeling the data, all the way to reports, apps and the AI layer. 90+ projects delivered across logistics, manufacturing, beverages, retail, services and HR, including multinational companies with global teams.

Stack: Microsoft Fabric · Power BI · DAX · Power Query · SQL · Python · PySpark · Databricks · Azure · Power Platform · Copilot Studio · Git · PBIP/TMDL

EXPERIENCE

Senior BI Developer | Analytics Engineer Sep 2024 – present
Start BIAI · Remote

Building data, modeling and AI solutions on the Microsoft stack for clients across multiple industries, including multinational companies with global teams.

- Designed dimensional models and enterprise semantic models in Power BI and Microsoft Fabric (star schema, advanced DAX, RLS, incremental refresh).
- Integrated and prepared data from multiple sources (Oracle, SQL Server, APIs, SharePoint, Databricks, Dataflows) using a layered Medallion architecture.
- Delivered BI as code with PBIP/TMDL, Git and deployment pipelines (DEV / TEST / PROD).
- Tuned model and query performance and audited models against Best Practice Analyzer rules.
- Prepared Copilot-ready models and built AI agents and automations with Copilot Studio and Power Automate.
- Built an AI-powered automation framework that generates standardized Power BI projects (model, measures and report) from source data.
- Delivered executive reports with data storytelling, working directly with business teams and international stakeholders from requirements to production support.

Data Analyst (Sales) Sep 2023 – Aug 2024
Patrus Transportes · Contagem, Brazil

- Built the sales and add-on services BI, integrating multiple sources into a dimensional model covering every sales area.
- Automated the commission dashboard: 20% less calculation time, higher accuracy and faster detection of system errors.
- Added gamification to the sales BI, increasing sales team engagement and performance by 150%.

Logistics Analyst Sep 2022 – Aug 2023
Pif Paf Alimentos · Contagem, Brazil

- Built inventory and stock dashboards in Power BI and apps in Power Apps, reducing inventory time, improving accuracy and cutting losses from slow-moving stock.
- Automated workflows, saving 35+ hours per month.

Industrial maintenance 2018 – 2022
Pirelli, Grupo DAP Engenharia, Eaton, Pif Paf Alimentos

Mechanical, hydraulic and pneumatic maintenance and improvement projects, such as a tool that saved 320 minutes in machine cleaning. A foundation in problem solving and process thinking.

SKILLS

Data modeling	Dimensional modeling (Kimball), star schema, semantic models, advanced DAX, Power Query (M)
Data engineering	Microsoft Fabric (Lakehouse, Data Pipelines, Dataflows Gen2, Notebooks, Direct Lake), Databricks, Delta Lake, PySpark, SQL, Medallion architecture
Enterprise Power BI	RLS, incremental refresh, performance tuning, Power BI Service, deployment pipelines
DevOps & governance	PBIP, TMDL, Git, Azure DevOps, documentation, Best Practice Analyzer
AI & automation	Copilot for Power BI, Copilot Studio, AI agents, Azure OpenAI, Power Automate, Power Apps
Sources	SQL Server, Oracle, REST APIs, SharePoint, Excel

EDUCATION

Systems Analysis and Development 2022 – 2024
Estácio University (associate degree in technology)

Data Analytics Program 2024
Xperiun | Data Analytics · 210 h

LANGUAGES

Portuguese (native) · English (intermediate) · Spanish (basic)

ACHIEVEMENTS

Two-time winner of the Xperiun Power BI challenge; the first edition had 92+ data analysts competing (road accidents case).

CERTIFICATES & COURSES

- Xperiun: Advanced Power Query, Data Modeling, DAX, Power BI Service, Data Visualization
- Big Data Real-Time Analytics with Python and Spark
- Advanced Power BI for Data Analysis
